GLOSSARY OF TERMS

Throughout this manual the following interpretations of terms apply except where the context implies otherwise:

Buyer	The government agency or Service Arranger that engages the contractor.
Client	Representative of a government agency (typically responsible for project funding).
Contractor	An organisation that is engaged under a transactional contract by a buyer to complete specified works.
DTF	The Department of Treasury and Finance
BMW	Office of Building Management and Works, Department of Treasury and Finance
Panel Member	An organisation that has qualified to be included on the Low Value Quotation Panels.
Contract Manager	The BMW Manager of the Low Value Quotation Panels Contract
Panel General Conditions	DTF Request Conditions and General Conditions of Contract, March 2008.
Principal	The Principal for the Panel contract is the Minister for Works. The Principal to a Transactional Contract will be specified by the buyer.
Project Manager	The officer of BMW or other government agency responsible for management of a project.
Service Arranger	An organisation that provides advice and establishes and manages contracts on behalf of Government Agencies through a separate contract with DTF.
Transactional General Conditions	The Conditions of Contract that may apply to a specific contract eg. BMW Minor Works Conditions of Tendering and Conditions of Contract.
User	The project officer representing BMW or the contracting government agency.

INTRODUCTION

The Low Value Quotation Panels (LVQP) allows government agencies to contract pre-qualified contractors for maintenance and minor works projects ranging between \$1,000 and \$150,000.

This manual sets out the process of selection, engagement and performance management of contractors who are members of the LVQP.

The LVQP is part of a suite of new contracts that support reform in building maintenance procurement and aim to increase efficiency and savings through improved service delivery and enhanced buyer satisfaction. Specifically, the LVQP establishes a procurement process that expedites the sourcing process, seeking to move projects to job completion within shorter timelines.

PANEL TERM

The LVQP will operate for an initial period of two years until 31 October 2010. Up to three annual extension options may be exercised after the initial contract period.

BUYING FRAMEWORK

The LVQP is established and managed by the Office of Building Management and Works of the Department of Treasury and Finance (DTF). Panel members have agreed to maintain standing offers to other government agencies on the same terms and conditions of contract to DTF.

WHO CAN USE THE PANELS?

LVQPs are intended for use by any government agency that has enabling legislation to enter into contracts to undertake works as described above. Service Arrangers can also use the LVQP to procure planned works under their contracts with DTF.

PANEL CATEGORIES

The LVQP consists of a range of trade categories based on differing values of work as outlined below.

\$1,000 to \$20,000

Bores & reticulation
Building / carpentry, doors, ceilings, plastering, fibre-cement general building activities.
Electrical
Fencing
Fire services including fire equipment
Floor Coverings
Landscaping
Line Marking
Locksmith
Mechanical Services / evaporative cooling, refrigeration, mech. services
Painting
Paving/ bitumen, concrete and brick
Pest Control
Playground and gym equipment
Plumbing and gas
Roofing
Security (Electronic)
Security doors
Trees
Window tinting

\$20,001 to \$150,000

Building (registered builders) carpentry, doors, ceilings, plastering, fibre-cement, general building activities.
Electrical and Electronic
Fencing
Floor Covering
Mechanical / evaporative cooling, refrigeration, mech. services
Painting
Paving
Plumbing and Gas
Roof Plumbing

SCOPE OF PANEL SERVICES

The following descriptions provide a brief overview of the work undertaken in the trade categories that support the LVQP.

Bores & Reticulation

Bore and reticulation services apply to larger scale work not covered under breakdown repairs. This could include supply, installation, upgrade, modification, major repairs and component replacement systems for non-potable uses not requiring a licensed plumber, e.g.:

- Drilling (sinking) of bores
- Pumps, motors and controls
- Bore screens, linings and casings.
- Development of new and existing bores.
- Valves and pipe work.

Building

Building services include general carpentry, joinery, doors, ceiling work, plastering and fibre cement sheeting and general building activities. Brick laying and concrete work is also included. Some painting work may be included where it is incidental to the major work being undertaken.

Where the estimated value of a building work project exceeds \$20,000 it is mandatory that a registered builder from the \$20,000 - \$150,000 trade category above be engaged. The Builders' Registration Board of Western Australia can provide assistance on 'prescribed limits' should the need arise.

Electrical

Electrical services include general electrical wiring installation and upgrade, switchboard replacement or upgrade, RCD installations and site power upgrades. Minor electrical works associated with a large building project is arranged by the builder responsible for the project.

Fencing

Member of this panel supply and install new fences or re-fence old boundaries but do not provide a breakdown repair service for existing fences. Materials supplied are based on proprietary fencing systems such as:

- Fibrous cement Panels with metal capping - e.g. 'Hardiefence'
- Profiled metal sheet, pre-painted – e.g. 'Good Neighbour' or 'Harmony'
- Tubular metal fences, pre-painted – e.g. Pool fence
- Chainmesh – with or without barbed wire, PVC coated and uncoated
- Timber paling and picket fences
- Heavy duty metal paling fences – e.g. palisade fences

Excavations and concrete associated with installation form part of the service.

This generally excludes specially constructed fencing such as brick, concrete block and limestone walls. These would be procured as building services or landscaping depending on the nature and extent of the wall and any associated works.

Fencing associated with a large building project is arranged by the builder responsible for the project.

Fire Services

Fire services include supply, installation, upgrade, modification, repairs and component replacement of:

- Fire hose reels
- Fire hydrants
- Sprinkler systems
- Gaseous fire suppression systems
- Smoke /heat venting and management systems (may include associated mechanical services)
- Fire door sets
- Fire detections systems – smoke and thermal detectors, fire alarm (indicator) Panels, direct dialling systems to fire brigade.
- Local fire alarms
- Emergency warning and intercom systems
- Pumps – diesel and electric powered

Portable fire fighting equipment such as extinguishers and fire blankets are not part of this service.

Minor works to fire services that are part of a large building project are arranged by the builder responsible for the project.

Floor Covering

Floor covering services include the supply and installation of resilient floor coverings such as broadloom carpet, carpet tiles, soft underlay, sheet vinyl, vinyl tiles as well as surface preparation of floors and laying of hardboard underlay where required. This excludes non-resilient finishes such as ceramic tiles.

Floor covering services that are part of a large building project are arranged as by the builder responsible for the project.

Landscaping

Landscaping is categorised into 'hard' and 'soft' landscaping and includes new projects and reworking of existing landscapes. Often the two landscaping types are combined but can be undertaken separately.

Hard landscaping includes earthworks, and the construction of retaining walls, terraces, garden beds, borders, structures such as trellises, water features and the like.

Soft landscaping includes planting, re-planting and plant care, soil treatments, mulching and lawn maintenance.

Locksmith

Involve large-scale replacement of locks for whole school.

Line Marking

Line marking services include the repainting of lines following repairs or installation of new car parking or sporting areas inclusive of parking bays, disabled labelling and traffic control symbols. Also included are associated works such as surface preparation, removal or blackout of existing markings.

Mechanical Services

Mechanical services include supply, installation, upgrade, modification, repairs and component replacement to:

- Air Conditioning
 - (i) Evaporative cooling systems
 - (ii) Refrigerated air conditioning systems – central ducted systems, split systems, cooling only and reverse cycle.
- Ventilation and extraction systems
- Refrigeration – cool rooms and walk in freezers (generally excludes 'plug in' refrigeration)
- Heating systems
- Boilers, furnaces and certain hot water installations
- Commercial kitchen and laundry equipment (fixed equipment).

Routine and breakdown maintenance of reverse cycle and evaporative cooling systems is part of Schedule of Rates – Zone Contracts for Mechanical Services and Evaporative Cooling

Mechanical works that are part of a larger building project are arranged by the builder responsible for the project.

Painting

Includes surface preparation and minor repairs using fillers and compounds and painting of aged and new surfaces including internal and external walls, ceilings doors, window frames, structural and non structural building elements that are not pre-finished.

Members of this panel also provide special purpose coatings such as corrosion inhibitors, sealers, anti graffiti coatings, floor treatments and roof coatings.

Painting that forms part of a large building project is arranged by the builder responsible for the project.

Paving

Loose Laid Paving

Loose laid paving includes the supply, laying, replacement, lifting and relaying and repairs to 'loose' laid paving such as clay and concrete paving bricks, concrete slabs and limestone blocks inclusive of associated site preparation such as minor earth works, placement of imported fill materials and base compaction.

Where paving works form part of a large building project they may be arranged as a building or landscaping service dependent on the nature of the associated works.

Bitumen Paving

Bitumen paving includes associated site preparation such as earth works, placement of imported fill materials and base compaction, as well as the supply of bitumen or other paving surfaces for either vehicle, pedestrian or sporting requirements.

Where paving works form part of a large building project they may be arranged as building or landscaping service dependent on the nature of the associated works.

Pest Control

Pest control services involve the treatment of whole buildings or multiple sites.

Playground and Gym Equipment

Involve major repairs not covered by breakdown maintenance.

Plumbing & Gas

Plumbing and gas includes water supply, drainage and stormwater installation and upgrade, tapware and fitting installation and water goods. It also covers gas installations and alterations. Excluded from this panel are grounds and garden reticulation installation or alterations.

Roofing

Roofing services includes non-structural works to the roof cover of buildings including the supply, installation, repair, and replacement of:

- Roof battens
- Safety mesh
- Thermal insulation
- Metal deck roofing sheets
- Clay and concrete tiles and shingles
- Fibrous cement sheet
- Flexible membranes
- Associated capping, flashings gutters, down pipes rain heads etc.

Security (Electronic)

Electronic security and access control services include supply, installation, upgrade, modification, repairs and component replacement to:

- Intruder alarm systems – infrared motion sensors, perimeter alarms
- Access control systems – control system for swipe card and proximity card activated door locks and automatic doors including head end processor.
- Close circuit television systems.
- Video motion detection.
- Intercom and call systems.
- Analogue and digital video and audio recording systems.
- Duress and medical alert alarm systems, fixed and portable (wireless).
- Public address systems.

Security Doors

Security door services include the manufacture, supply, installation and upgrade of security doors and window screens including locks, associated fittings and anti tamper secure fixings.

Tree Management

Tree management involves the removal of large trees and pruning projects that fall outside the scope of breakdown repairs.

Window Tinting

Window tinting services include the supply and application of window films including:

- Sun control film – tinting and reflective films
- Security and safety film
- Anti-Graffiti film
- Graphics and decorative films - frosted films, logos and vision strips.

HOW TO USE THE PANELS

The buyer should prepare a scope of works for the project together with a budget. A consultant from the DTF Small Value Consultancy Panel (SVCP) could assist in the preparation of the scope of works. A quotation package including contact details for enquiries, preliminaries, technical specifications, any specific conditions and a closing date for quotes should be prepared.

The buyer should select the appropriate value category and trade group for their project and issue a request for quotation to all members of that trade group. This ensures a fair process for all members.

Buyers should evaluate bids received in line with State Supply Commission policies e.g. *Value for Money, Buy Local and Open and Effective Competition* or any other policy that may be specific to the Buyer. The buyer should also ensure that the respondent is able to undertake and complete the works within the timeframes specified in the request.

FORM OF CONTRACT

All contracts will be Lump Sum.

BRIEFING OR SCOPING THE WORK

The provision of an accurate and fully documented brief for the work proposed is a major factor in establishing a successful outcome. Buyers are encouraged to understand and communicate their needs in a consistent and repeatable manner when calling for quotes from the LVQP. It is essential that all panel members have identical information from which to prepare their quotes.

All information relevant to the work proposed should be provided to panel members including:

- Drawings or diagrams of the work location;
- Drawings or diagrams of the extent of the work;
- Specification of work and material standards required;
- The expected commencement and completion dates;
- Any restrictions that may apply to the work site – access restrictions, times of operation, security requirements, noise levels and the like. This is particularly relevant to any work that may involve hazardous material repair or removal;
- A clear indication of what is included in the scope e.g. is any material being supplied by the buyer; are there furniture items to be removed/replaced; access to premises and sensitive areas.

MANAGEMENT OF THE WORK

The buyer is responsible for managing the work arranged directly through the LVQP including on-site liaison with the contractor, the issue of directions and variations to the scope of the work, acceptance of the work, payment of contractor invoices and the like.

Work arranged through a Service Arranger or BMW will be managed by the respective party.

WORK STANDARDS

Work standards will be determined and specified by the buyer for each transactional contract. The Contractor will adhere to all OH&S provisions and comply with the directions of the buyer.

COMPLETION

The buyer is responsible for inspection and acceptance of the completed work, in accordance with the conditions of the transaction contract used for the works. Issues of work standards, cleanliness of the work area, handover of any warranties, guarantees, operating manuals, issue of practical completion certificates and the like should be considered at the completion stage.

INVOICING AND PAYMENT

Contractors will invoice the buyer direct. Invoicing on larger projects may be progressive, with monthly claims for progress payments. Work less than \$20,000 will usually be invoiced on completion. Buyers are required to make payment within 30 days of the receipt of a correctly rendered invoice in accordance with terms specified by the Department of Treasury and Finance and the Financial Management and Accountability Act (FMA Act).

PANEL CONTRACT MANAGEMENT

Management of the LVQP will be undertaken by BMW through its Contract Manager. All issues relating to membership, operation, and the standing offers made by panel members, are managed by the Contract Manager.

DISPUTE RESOLUTION

In the first instance, the BMW Project Officer, Service Arranger or client agency and the contractor will make every endeavour to resolve any dispute through negotiation. If a satisfactory result is not achieved then the parties may refer the dispute to the Contract Manager for mediation.

LVQP 2008 CONTRACTOR DETAILS

The list of low value quotation panel members along with their contact details is attached.
